

Quality policy

At Gestamp, we want to become the most renowned automotive supplier for our customer orientation and the quality of our products over their lifetime, while maintaining a sustainable economic, environmental and social footprint.

In order to position ourselves at the forefront of innovation in the automotive sector, we make every effort to research and thus develop innovatively designed products and trendsetting technologies. We aim to facilitate increasingly safer and lighter vehicles in order to reduce energy consumption and environmental impact.

In addition to applying our zero defect strategy, we strive to become a benchmark in quality for our customers through continuously improving our products and the efficiency of our processes and systems (quality management system), focused on preventive quality based on risk management.

As a good corporate citizen, we assume responsibility for our products, our employees, the environment and everyone who are affected by our actions satisfying the applicable requirements.

In line with our corporate strategy, the following values represent our commitment:

- The client as the center of business;
- Operational excellence as a regular practice;
- Innovation as a means of progress;
- Sustainability to ensure permanence in time;
- People as architects of success.
