

ENVIRONMENTAL POLICY

The Management of Gestamp North America is aware of the center's effects on environment and therefore, undertakes to develop its activity protecting and respecting the environment according to the following basic principles:

- ❖ To guarantee that all INTERESTED PARTIES will know this Environmental Policy and that they receive the appropriate COMMUNICATION so that they are entirely aware of the environmental aspects that affect the organizations.
- ❖ To define a set of objectives and targets for the environmental improvement, establish the necessary resources and revise periodically those objectives and targets to ensure their suitability regarding the stated policy.
- ❖ To comply with and keep a suitable monitoring of the environmental regulations in force and, if it were the case, of those commitments that the company voluntarily signs AND THE REQUIREMENTS OF INTERESTED PARTIES.
- ❖ To implant an Environmental Management System and keep it up-to-date according to a process of Continuous Improvement.
- ❖ To obtain manufacturing processes and procedures that guarantee the protection of the environment, trying to prevent pollution, control and minimize the negative effects that its activity generates in the environment including mitigation of climate change.
- ❖ To put this Environmental Policy at the disposal of any association or private individual that may be interested.

The Management will watch that all the necessary means to ensure the application of the Environmental Policy are available in all fields of Gestamp North America.
